

Line of Fire

Identifying sources, understanding triggers
& planning for prevention

LINE OF FIRE

Line of Fire training is a full 1-day session.

Line of Fire is a term that describes the potential travel path of an energy source in relation to people, the environment and equipment. Line of Fire events exist in all work locations and have the potential to cause serious injury or death if someone places themselves in the Line of Fire.

When reviewing incident alerts, it is evident Line of Fire events are the single leading cause of injuries across numerous industries. Several factors can lead or contribute to personnel placing themselves in the Line of Fire and it is understanding these factors that allowed Jacobshill to develop a learning solution targeting Line of Fire. The session provides essential training for any company wanting to prevent injuries at work.

There are no new incidents. Industries keep repeating the same events with new personnel being injured.

WHEN YOUR TEAM KNOW
HOW TO IDENTIFY AN
ENERGY SOURCE AND
UNDERSTAND THE
TRIGGER FOR RELEASE,
IT WILL INFLUENCE HOW
YOUR TEAM PLAN THEIR
ACTIVITIES TO PREVENT
LINE OF FIRE EVENTS.

► Methodology

The session has been designed to assist work site personnel during the activity planning stage and as part of their ongoing risk assessment throughout the task. The session explores the principles and concepts of Line of Fire reviewing the energy source wheel and how individually these are applicable to your teams work environment. Working through case studies and examples for each of the energy sources we review why personnel are susceptible to missing Line of Fire situations and how they can prepare to look deeper and see where controls are required.

► Outcomes

Attendees will gain an appreciation of how easily they can become blind to Line of Fire which then helps enhance their understanding of the need to apply the skills from the session in their everyday work.

- Identify Energy Line of Fire Source.
- Recognize potential triggers for Line of Fire events.
- Apply these skills during risk assessment.
- Apply the skills continually throughout activities.

Each attendee will be provided with a personalised set of Prompt cards for their use when in the workplace.

By nothing more than wanting to do a job your team will place themselves in the Line of Fire.

Line of Fire events are the single leading cause of injuries. Protect your workforce today.
